

I'am writing in protest of giving LPFM stations priority over Fm stations. We support an FM station called K-LOVE and we would not get this station without fM translators. K-love is a great service to my family and this community. It is an informative and encouraging station. There is not another station that is like it around this area and it would be a real disservice to this community to be displaced by an LPFM. This K-LOVE station is in the public's best interest in giving an alternative radio station other than a secular station that a lot of times has music and vocabulary that many of us would rather not expose our families to. Thank you for your consideration.
